

User Feedback

We have done some initial user tests with users. Here are general overall comments so far :

1. Love the Design. Very clean and bright
2. Somewhat confused on how all the investments work
3. How would I link my bank account, withdraw investments and how would like to know more about how it all works General positive feedback too far.

We will continually be user testing and gathering results the next few weeks using several user testing tools and platforms (FullStory, Lookback.IO, Usertesting.com,etc.)
